## PURE AIR FOR POULTRY.

Approved System of Ventilation For Poultry House.

There are a number of ideas for the ventilation of poultry houses which are very desirable, but most of them are expensive to put into operation. The main benefit to be obtained from ventilation is dryness of atmosphere, which of itself means the circulation of pure air. In any plan of ventilation the air from but of doors should be taken in from near the bottom of the house and follow the ventilator until it reaches the top or nearly so before it is allowed to escape into the room. Iowa Homestead thinks the plan of ventilation indicated in the illustration is one of the best known. The foundation for a comfortable dry

## PLAN OF VENTILATION.

house is laid in the floor, which is of concrete kept thickly covered with straw. The shaft is run in an angle, entering the house at the point indicated by the arrow at the bottom left and escaping into the room at the point in the shaft indicated by the upper arrow, which opening is covered with wire netting. At the point B an opening is cut into the shaft, through which the foul air escapes into the shaft and out at the point of the ventilator on the outside of the house. A damper is provided (letter D), so that the current of air can be controlled in the event of a windy day. The detailed drawing at the bottom of the cut shows how this damper is operated. The whole plan is simple, easily put in operation and will be found very effective.

## GRADING UP THE FLOCK.

Reservation of Ewe Lambs For Flock Improvement.

Too much care cannot be exercised in selecting out the ewe lambs that possess the power to strengthen and permanently fix desirable qualities in the flock. Flock masters make a big mistake every season in not giving more attention to selecting their best ewe lambs.

The demand for breeding stock for starting new flocks should not induce flock masters to part with their best ewe lambs. Not in many years have I known of breeding material commanding such a high premium as now. The price offered by some anxious buyers will be a big inducement to let go some of the best ewe lambs, thinking that another year you will have some more just as good. It is right here that some short-sighted flock owner is going to fall down, says Leo C. Reynolds of Michigan in National Stockman.

## Sure Way to Quit Business.

As many of the ewe lambs should be retained in the flock as will effect an improvement, because the flock generally is in need of their recruiting strength. There are always a few old ewes that must be culled out and disposed of each season in order to keep up the average of the flock. Then, too, if the old ewes are allowed to remain they reach that age when they decidedly increase the loss which occurs at lambing. I know of one man who has been selling off his entire lamb crop each season for the past three years, not retaining a single ewe lamb to replenish his flock. He has made some money the past three years from this shortsighted practice, but now is practically out of the sheep raising business. Don't follow this practice unless you are anxious to go out of sheep raising, as it is one of the surest methods of quitting the business.

## Dr. KENNEDY'S FAVORITE REMEDY

PLEASE TAKE,  
POWERFUL TO CURE,  
AND WELCOMES IN  
EVERY HOME.

KIDNEY AND LIVER CURE.

Dr. Kennedy's Favorite Remedy is adapted to all ages and both sexes, effecting permanent relief in all cases caused by impurity of the blood, such as, Eczema, Itch, Bladder and Liver Complaints, Constipation, and weakness peculiar to women. Successful for 30 years. Prepared by DR. D. KENNEDY'S SONS, Bland, N. Y. \$1.00 all druggists. Six bottles \$5.00.

One of the hotels in the Place Vendôme, Paris, has an arrangement of pipes fixed high in the air over the courtyard by which a shower of rain is obtained whenever required. The guests may sit under an immense umbrella twenty-five feet in diameter, enjoying the cool rainfall on a hot summer day.

## TALK OF THE TOWN.

Tenement to rent to right parties at 3 Elmore street. Call after 6 p. m.

Old gold and silver wanted at refiners, prices in exchange for goods at F. E. Burr's.

L. P. Austin sells stone cutters' glasses, all kinds and prices. From 20c to \$2.00 each.

Stone-cutters' glasses, 20c per pair. Lenses, per pair, 5c. F. E. Burr & Co., 85 North Main street.

Ask for a free sample of Rexall Orderlies, a new produce which has been proven by actual test to be the best laxative and cathartic known to medical science. Pleasant to taste, no griping, no pain. 10c and 25c. Red Cross Pharmacy.

W. G. Smith, who has repaired over 400 sewing machines in Barre and vicinity during the past ten months, will continue to do so until October 15, when he will go to the coast of Maine to spend the winter. Machines repaired at your homes and made to work as well as when new or no pay. Leave your name and number, or address card to W. G. Smith, No. 28 West street.

## Danger from the Plague.

There's grave danger from the plague of coughs and colds that are so prevalent, unless you take Dr. King's New Discovery for consumption, coughs, and colds. Mrs. Geo. Walls of Forest City, Me., writes: "It's a Godsend to people living in climates where coughs and colds prevail. I find it quickly ends them." It prevents pneumonia, cures a gripe, gives wonderful relief in asthma and hay fever, and makes weak lungs strong enough to ward off consumption, coughs and colds. 50c and \$1.00. Guaranteed by the Red Cross pharmacy. Trial bottle free.

## FARM CONVENIENCES.

Homemade Contrivances That Answer Very Useful Purposes.

First is a land drag, clod crusher or leveler. Take three planks 2 by 10 the length you may want your drag, place these together shingle fashion, exposing say five inches; nail down good and strong, bore a hole two or three feet from each end and pass a No. 9 wire ten or twelve feet long through these holes to pull by.

For moving from one field to another, make a hole in the end of center plank and pass a short piece of wire through this. By this means you can convey it from one place to another on a very narrow turnrow. Another important thing is the riding plank. This consists of a board one and one-half or 2 by 12 inches, six feet long, which should be bolted on near the center of last plank.

This machine should be run with the cutting or exposed edges forward; that is what does the work. These edges

## CLOD CRUSHER AND LEVELER.

should be faced with hoop iron or something of the kind to keep them from getting dull. Now, who ever heard of a drag getting dull? But it is a fact, and they are no good after the edges become rounded, says a correspondent who describes this contrivance in Farm and Fireside.

I saw a farmer the other day dragging a log twelve or sixteen inches in diameter and that many feet in length. It is hardly worth while to say he was wasting time and a whole lot of mule strength, for he had four hitched to it. I told him of my drag and he said he would go at once and make one.

Talk about harrows; they are mighty fine in ground that is already in good shape, but for rough, cloddy ground they are not in. I send a sketch of this drag.

Another thing I want to mention is a device for putting under weeds and grass in plowing land. I find two trace chains do the work for me all right. To adjust, take a short piece of cotton line—I say cotton because it is softer than hemp—and run it through the rings. Tie this to the beam of your plow just forward of the stock. Now twist the chains a little and tie a knot in them that will fall just in front of the moldboard, and hook the other ends to the single or double tree. Now don't be satisfied if these chains half-way do the work, but change them till you get them just right, and you will wonder why somebody didn't tell you about this sooner. I can cover up any weeds with these chains unless they are longer than my rows.

## Bain to Order.

One of the hotels in the Place Vendôme, Paris, has an arrangement of pipes fixed high in the air over the courtyard by which a shower of rain is obtained whenever required. The guests may sit under an immense umbrella twenty-five feet in diameter, enjoying the cool rainfall on a hot summer day.

## A Roofed Lake.

On the Mangishlak peninsula, in the Caspian sea, there is a lake that has a roof of salt crystals thick and strong enough to allow men and horses to cross it on foot.

## When to Pull Onions.

Pull onions as soon as most of the tops have died down, leaving the bulbs on the ground to cure. Gather them up when perfectly dry and store them in a dry loft or other airy place.

## SCALDED, HE RAN HALF MILE

Fireman, Fatally Burned, Thought Only of His Imperiled Companions.

## GOT THEM AID, THEN DIED

Heroism of New Jersey Pumping Station Employee Kept Him Going Until He Informed Engineer of Disaster.

The boilers at the pumping station of the Atlantic City waterworks at Absecon, N. J., blew out recently. Three men were in the narrow, high vaulted room at the time. They were Joseph Medara, a fireman, and Ezekiel Adams and Archibald Connelly, stokers.

As the water tubes were rent with a roar plainly heard in Atlantic City, three miles away, the room was filled with scalding steam and blazing cinders, forced out of the fire pans by the back draft. The cloud suffused the room in an instant, burying each man from the sight of his fellows in a thick blanket of fog. The three were driven back, Medara being blown through a door into the open, safe, but stunned and burning.

Medara's first thought was of his fellows. There was no one within hailing distance to bring help, and the roar of the broken water pipes would have drowned his voice had he hailed. Without a thought as to his own safety he plunged into the steam and started forward about the circle of the room that he knew so well.

Hands forward and head down he worked his way painfully and stoically, groping this way and that and trying to call to his companions to tell him where they were. He felt with his feet, he worked his body, all the time suffering untold agony in that terrible fog.

A blast of steam struck him and hurled him against a far wall, where he fell, choking and burning and realizing at last that he was powerless to aid his companions.

He worked his way along the floor in the direction he vaguely remembered the door to be. Luck was with him now, and he got to the open again. Then, with his flesh virtually boiled on his bones, he still thought only of his companions and believed that there might yet be time to save them could he make one supreme effort.

He struggled to his feet and started toward the home of Chief Engineer Ire-

land. Ireland told them how he had got word of the accident. All three hurried back to the house. On the way the two stokers told of their escape. They had been blown through a wide window and thus saved.

An automobile was passing, and Ireland hailed it. It was improvised as an ambulance and the limp form of the heroic fireman was placed in it and hurried to Atlantic City hospital. Medara died on the way.

Baby Starts Fire; Woman Burned. Mary McKimsey of Elmira, N. Y., seventy years old, while attempting to extinguish a fire started in her home by a child, was burned to death.

## ONION GROWING.

Changed Conditions in a Famous Connecticut Industry.

As a commercial onion producing section that part of Connecticut just west of Bridgeport bordering on the sound known as the Southport district has long been famous. Although the cultivation of onions is still of great moment locally, less attention is given the crop by outside interests than formerly. This is due not so much to any decadence in the sound industry as to other parts of the country, notably the west, forging ahead in growing onions for supplying the New York market. There is perhaps not a man living who remembers the time when onions were not grown in the Southport district. The important center, as many of our readers are doubtless well aware, are Greens Farms, Southport, Westport and Fairfield, with the first named now accredited the leading producer, says New England Homestead, a representative of which recently paid a visit to this section and talked with some of the foremost growers in the Fairfield district regarding their experiences with the recent crops.

Smaller Tracts, but More Growers. From this source it is reported probable that the total acreage, taking the section as a whole, is not as large as in some seasons a few years ago. Farmers believe onions to be a paying crop in average to good seasons and claim that with conditions leaning in their favor they would look on the industry in a different light.

A notable feature of the changed aspect of the sound industry is the reduced size of tracts under cultivation. Several years ago farmers raised thirty to forty acres each, but now the majority put in four to six acres or even less. Of course many new growers are materializing from year to year.

Prices Highly Encouraging. A. P. Wakeman said that last year's crop sold in a highly encouraging manner. With seasons as favorable following each other for the next two or three years there would no doubt be a renewal of interest in onions among the sound growers. "We averaged \$2.50 to \$3 per barrel for our 1904 crop," said Mr. Wakeman. "Yellows brought us \$2.75 to \$3.25 and whites \$5 to \$8. White onions often sell particularly well late in the season."

The first persons he met were Adams and Connelly, themselves suffering

land, half a mile away across the meadows. Ireland was attracted by the man's screams. Running out on the porch he met the man as he staggered up. Medara fell trying to tell what had happened, but he only mumbled.

The engineer could scarcely recognize him in the form before him that of his fireman. He caught the words "explosion," "Adams" and "Archie." Summoning his family to care for the fireman, Ireland ran to the pumping station.

## A GOOD REASON.

The People of Barre Can Tell You Why It Is So.

Doan's Kidney Pills cure the cause of disease, and that is why the cures are always lasting. This remedy strengthens and tones up the kidneys, helping them to drive out of the body the liquid poisons that cause backache, headache and distressing kidney and urinary complaints. Barre people testify to permanent cures.

J. H. Hooker, retired, of 101 Prospect street, Barre, Vt., says: "Doan's Kidney Pills, which I got at E. A. Drown's, did me more good than all the prescriptions and other remedies I ever used. Over eight years ago I gave a statement for publication telling what they had done for me, and today I have even more confidence in them than I had at that time.
